INDEPENDENT RESEARCH PREVIEW

Earth in view.
Evidence in reach.

Official records. Visible dates. Clear attribution.

A professional public preview with English, Spanish, French and Portuguese controls.

EVIDENCE WITH CONTEXT

Understand the record and its source.

USGS

Reported seismic records that can change as they are reviewed.

NASA EONET

Curated natural-event references with potentially approximate extents.

GDACS

Indicative disaster assessments and modelled impacts.

MET Norway

Model forecasts at a point. Forecasts remain separate from events.

Source and capture dates remain visible. Counts are source records, not unique disasters.

AN INTERACTIVE EXPERIENCE

Explore with confidence.

Search records, filter regions, inspect Scythe context and follow the official source.

Optional audio and visual cues. No official warning or rescue dispatch is implied.

OFFICIAL RESOURCES AND MEDIA

More context.
Responsible credit.

14 official resource entries

Search agencies and provider support routes. Follow the responsible local authority for immediate danger.

Original brand concepts

A BASTION-KERN monogram and OFFENTLOGSPOT orbit mark, with the requested founder attribution.

Authentic NASA imagery

Historical 2016 Earth-at-night data and an Aqua artist’s concept. Visibly credited, never described as live telemetry.

Provider logos are omitted where the necessary permissions were not established. Official names and links remain.

RIGHTS AND VISITOR CHOICE

Clarity before access.

Ownership is scoped

Original material rights are reserved. Official data, facts, agency marks and third-party components retain their own rights.

Licenses have different scopes

Apache is a reference, not a license applied to BASTION-KERN. Apple and browser terms do not imply certification.

Privacy stays explicit

No external analytics or precise device location. Local session counters reset on reload. Sound is optional.

English evaluation terms are the reference text. Jurisdiction-specific legal review is required before public commercial launch.

VERIFIED PROGRESS AND NEXT STEPS

A foundation for Guardian and Overwatch.

Verified now

37 local checks passed. Four-language controls, searches, forecasts, empty states, sound feedback and responsive layouts were reviewed.

Guardian / proposed

Saved areas, dated evidence digests, local forecasts and clear notification choices.

Overwatch / proposed

Multi-area review, team-oriented evidence summaries and reviewed export rules.

The preview is local and periodically checks official sources. No public deployment, membership release or zero-cost operation is promised.
